

Wearing and Care of your MagneMax Sets

MagneMax Series 7 Magnetic Necklace and Bracelet “Looking GREAT has Never Felt so GOOD”

The MagneMax ‘Charging’ Necklace when worn close to your Neck and directly over your Collar Bone, is like the ‘Alternator’ in your Car that ‘Charges’ your Battery while the MagneMax ‘Maintenance’ Bracelet, ideally worn on your right wrist is more like the ‘Regulator’ in your Car that ‘Maintains’ an adequate Level of Energy.

Both the MagneMax ‘Charging’ Necklace with the MagneMax ‘Maintenance’ Bracelet, can provide Significant Results when used together to Increase Blood Circulation consequently Increasing Oxygenation providing an Increased Energy Level, Improved Concentration and Memory while Lowering those who Suffer from High Blood Pressure and so many symptoms associated with High Blood Pressure. MagneMax can also Reduce or Completely Eliminate Chronic Pain, Headaches, Backaches, Dissolve Stress and so much more.

Magnetically Adjusts to Size, “MagneMax is shipped as one complete strand of connected magnets which measures approximately 29 inches which can be Disconnected and Resized to create your Perfectly Sized ‘Charging’ Necklace and ‘Maintenance’ Bracelet. For bedtime, you can take off your magnets and re-size them to make 2 anklets worn loosely around your ankles while you sleep.

If the Barrels are separated and not 'Very Carefully' reconnected, the Power from these two separated 'Barrel' Magnets will collide and cause the Iron-Core to Crack, Chip or Break. Take care to avoid Colliding the Barrel Magnets as they are VERY Powerful. We Strongly Suggest not to separate the Barrel Magnets for this reason; however, if you do, be Very Careful not to crash them together when reconnecting them.

If you do not Maintain the Care of your MagneMax Magnets by Soaking them in a Natural Oil such as Olive or Coconut Oil, they will become susceptible to Oxidation when in contact to the Salt produced from Perspiration. This causes an Electrical Current aka 'Galvanic Reaction Response' (Electrolysis) and especially when worn while Working-out or Swimming which will Increase Oxidation. This is one reason why we also suggest wearing MagneMax 'loosely' around both Ankles.

After receiving your MagneMax™ Series-7 Magnets, soak them in ‘Olive Oil’ for 24-hours then again every 2-weeks or at least once a month to maintain their Original Luster and Beauty. Applying a natural oil to your Magnets also helps to provide better ‘Contact’ to transfer the Magnetic Energy more Effectively and Efficiently through your Skin. Clean your MagneMax™ Series-7 Magnets regularly from Iron Dust that may stick to your Magnets. Occasionally dip a dry cloth in lemon juice and salt and wipe the magnets as this will help clean and to maintain luster of the magnets. Maintain and clean your MagneMax™ Series-7 Magnets regularly as they may last for several years.

MAGNEMAX™ SERIES-7 PROVIDES A FULL 180-DAY REPLACEMENT WARRANTY AGAINST ALL MANUFACTURERS DEFECTS.

MagneMax™ Series-7 Magnetics Warranty becomes null & void if the following conditions occur: Abuse, Intentional or Unintentional Physical Damage to the MagneMax™ Magnets, Improper Use or Improper Maintenance.

Your MagneMax Sets should NOT be worn when working around heavy machinery & construction sites

ATTRACTING MORE THEN JUST ATTENTION

For the REST of your Life

"Look Good. Feel Great. Live Longer"

CARE AND MAINTENANCE

FOR THOSE USING PLASTIC TUBING OVER THEIR MAGNETS

After receiving your MagneMax™ Series-7 Magnetic SET follow these Instructions carefully...

For those who choose to use a Clear Plastic Flexible Tube over their MagneMax Necklace and Bracelet, this type of Tubing is available at most hardware stores. Measurement is ½" Outside Diameter and 30" in length.

1. Adjust the Size your MagneMax Necklace to fit Directly Over your Collar Bone and your MagneMax Bracelet or Anklet to Fit Loosely and Comfortably by Removing the Excess MagneMax Links

2. Insert your (Sized) MagneMax Necklace into a 30" x ½" Clear Plastic Flexible Tube and Cut the Tube Exposing One MagneMax Silver Ball at Each End. Repeat this Process with your MagneMax Bracelet or Anklet.

Always remember to Separate your MagneMax Energy Band Between the 2-Balls.

Magnetic Therapy and Therapeutic Properties

Since ancient times, civilizations like the Egyptians knew about the therapeutic properties of magnetism. The application on human health through the use of magnet energy has become more popular as today there is a greater variety of magnetic products for industrial, domestic and therapeutic purposes. The use of magnets for therapeutic purposes has been explored over the past 200 years. However, the technology necessary to bring forth therapeutic results due to the discovery and access to high-gauss magnetic fields came forth over the last 20 years.

When the brain is exposed to a high-gauss (10,000 or greater) negative magnetic polarity, it slows the brain's pulsing frequency thus creating a calming effect. The reverse also applies: when the brain is exposed to a high-gauss positive polarity, it speeds the brain's pulsing frequency thus creating an overstimulation of brain activity which can be experienced as an inability to slow the mind, insomnia, nervousness and/or anxiety. Thus, a negative magnetic polarity is anti-stress, whereas a positive magnetic polarity is stress producing. A minimum of 8,000 gauss is necessary to penetrate the surface of the skin.

According to magnetic therapy expert, neurologist William H. Philpott, MD, (Magnetic Health Quarterly, 2001) *“My research has abundantly confirmed the observations of Albert Roy Davis and Robert O. Becker. As a neurologist, I documented by EEG that a positive (north-seeking) magnetic field is neurologically exciting (stimulating). The higher the gauss strength, the higher the excitement. A sufficiently high positive (north-seeking) magnetic field can evoke seizures in those so predisposed. A negative (south-seeking) magnetic field is neurologically calming. The higher the gauss of the negative (south-seeking) magnetic field, the slower the brain pulsing on the EEG. This information sets the stage in understanding how a negative (south-seeking) magnetic field controls neurological excitement in neurosis, psychosis, seizure potential, addictive withdrawal and movement disorders.”*

All electronic environments and devices such as laptops, cellphones, tablets, desktop computers, microwave ovens, wifi, smart meters, electric blankets, air travel and electric and hybrid automobiles, emit a positive electromagnetic frequency. This also includes magnetic pads that plug into a wall outlet that are used for healing as they also emit electromagnetic frequencies. When you are exposed to these positive electromagnetic environments, your cells' polarity reverses from a negative polarity to a positive polarity. This is damaging to your body.

Cells require a negative magnetic polarity for optimal health. When a cell is repeatedly exposed to a positively charged electromagnetic frequency, it loses its ability to maintain its' oxygen levels and also becomes acidic. This creates an environment in the cell that welcomes toxins, pathogens, bacteria, fungus, mold, parasites, viruses and heavy metals to take residence.

According to physicist Albert Roy Davis (The Magnetic Blueprint of Life, 1979) *“The positive magnetic field (traditional north-seeking pole) spins electrons clockwise while the negative magnetic (traditional south-seeking pole) spins electrons counter-clockwise. These opposite electron spins from opposite magnetic poles provides predictable opposite biological response. The biological response to the positive magnetic field is acid-hypoxia (acidity and low oxygen). The biological response to the negative magnetic field is alkaline-hyperoxia (alkalinity and high oxygen).”*

Long term exposure to positive electromagnetic frequencies generate free radicals which cause inflammation. Recent medical discoveries indicate that the root cause of most diseases is inflammation. Free radicals are peroxides, acids, alcohols and aldehydes. Free radicals are the cellular waste produced by sugar, alcohol, carbohydrates and a high protein diet.

Long term cellular exposure to a positive magnetic frequency creates a low oxygen and acidic environment. This environment sustains the necessary life energy of microorganisms and cancer cells, and destroys the necessary life energy of the human cells.

Whereas a constant exposure to a negative magnetic field creates an alkaline and high oxygen environment. This environment sustains the necessary life energy of human cells and destroys the environment required to sustain microorganisms and cancer cells.

Use of the negative polarity of the magnets can reverse a positively charged cell back to a negatively charged cell, thus restoring health back to the cell by increasing its oxygen level and eliminating the acidity.

When viruses, parasites, heavy metals, bacteria or fungi (which live in a positively charged acidic environment lacking oxygen) are exposed to a negative magnetic frequency, they become neutralized the same way a credit card magnetic strip loses its memory when exposed to a magnet.

Positively charged tissue also magnetizes unto itself toxic chemicals and heavy metals. The long term exposure to a high gauss negative magnetic field chelates heavy metals and toxins out of the body. For those with high levels of toxic chemicals and heavy metals in the body, this chelation process can be intense (headaches, rashes, fatigue and flu like symptoms). **If one experiences this type of intense detoxification**, it is recommended they slow down the exposure but don't stop the exposure to the magnets. Good hydration is essential to assist with the cellular healing along with a diet including low carbohydrates, low sugar, moderate protein and the elimination of alcohol.

A positive magnetic field creates the following:

- Stress, anxiety, nervousness
- Promotes physical addiction
- Blocks the production of melatonin by the pineal gland
- Lowers your oxygen levels on a cellular level
- Promotes acidity on a cellular level
- Encourages inflammation in veins and capillaries thus compromising circulation
- Creates inflammation and encourages edema (water retention in the cell)
- Encourages bacteria, viruses, parasites, fungi growth and heavy metals within the cell
- Free radicals
- Insomnia
- An environment conducive for disease proliferation

Benefits of a negative magnetic field:

- Blocks the biological responses to stress
- Reduces endorphin overstimulation which causes one to be wound up
- Reduces endorphin overstimulation which promotes addictive tendencies
- Assists cells to stabilize and heal
- Assists in the sleeping process by increasing melatonin production by the pineal gland
- Improves the cell's alkalinity and oxygenation
- Creates an alkaline and oxygen rich environment in the body which assists the body in reducing internal bleeding and water retention
- Assists in enzyme production for energy necessary for human cell metabolism
- Detoxifies the biological inflammatory free radicals (peroxides, acids, alcohols and aldehydes) which are the by-products of a diet that includes sugar, alcohol, carbohydrates and high protein
- Destroys the necessary life sustaining energy of microorganisms and cancer cells
- An environment hostile for disease proliferation

- Supports the immune system
- Supports production of necessary enzymes
- Assists the detoxification of heavy metals
- Charges the red blood cells with the magnetic energy required for the production of energy
- Increases circulation
- Protects the body from EMF exposure

According to Grant Gerondale, Magnetic Therapy 101, 1998:

“It should be made clear that bio-magnets themselves do not heal anything, they only stimulate the body to heal itself. Magnetism is a wholly natural event. It is not magic, it merely allows body cells to exist at their optimum level.

In recent years developments in healing through electrical and magnetic therapies have increased exponentially. In the treatment of sprains, strains, broken bones, burns and cuts, not only does magnetic field therapy aid in the recovery, but it allows these conditions to heal better, more quickly, and with less scar tissue. Magnetic treatment has been shown to decrease healing time by half or more.

ACCORDING TO BURLY PAYNE, Ph.D. in psychology and a M.S. in physics, psychologist and inventor of the first biofeedback instruments; ‘These sensitive research instruments have allowed scientists to document some of the ways that magnetic fields affect living organisms. Among them are:

- 1) Increased blood flow with resultant increased oxygen-carrying capacity, both of which are basic to helping the body heal itself.*
- 2) Changes migration of calcium ions which can either bring calcium to heal a broken bone, or can help move calcium away from painful arthritic joints.*
- 3) The pH (acid/alkaline) of various body fluids (which are often out of balance in conjunction with illness or abnormal conditions) can apparently be altered by magnetic fields.*
- 4) Hormone production from the endocrine glands can be either increased or decreased to normal levels by magnetic stimulation.’*

QUOTING DR. RICHARD BROERINGMEYER (Author of Principles of Magnetic Therapy and doctor at NASA who studied magnetic therapies on astronauts):

‘It has been clinically established that North pole (South-seeking) energy arrests protein activity, draws fluids, contracts, vaso-constricts, increases alkalinity, acts to sedate or inhibit pain, decreases activity, increases potassium ions, decreases abnormal calcium ions and decreases hydrogen ion concentration. The North pole (South-seeking) can be said to be the normalizing energy. It normalizes the alkaline state of the body but never produces an over Alkalinized condition. It oxygenates the body but never produces Oxidized free radicals. It has a normalizing effect no matter how long the exposure.’

NORTH POLE (South-seeking) MAGNETIC ENERGY IS BEING USED FOR THE TREATMENT OF:

arthritis, bleeding wounds, sores, boils, eczema, skin rashes, burns, infections, toothache, kidney infection, kidney stones, cancer, diabetes, high blood pressure, bladder conditions, stomach ailments, all kinds of inflammations and swelling, broken bones, etc.”

Health Benefits from Day One of Using Magnetic Energy...

- **Improves your circulation**
- **Encourages deep, long and restful sleep**
- **Maintains a toxin free body**
- **Induces an abundance of energy**
- **Strengthens your immune system**

How? In layman's terms, clinical magnetic therapy speeds up blood flow and causes several things to happen in your body:

Firstly, your circulation is improved. Basically the blood flows around your body more effectively, so you get more oxygen and nutrients to your organs, muscles, joints and limbs.

Secondly, clinical magnetic therapy will help to balance your hormone levels. What this means is, the hormones insulin, serotonin, endorphin, and melatonin will be more readily available and better regulated. When your melatonin (the hormone which induces sleep) levels have regained their optimum concentration you will enjoy a deep and restful sleep.

Thirdly, the magnetic field aids the body in realigning the positive and negative ions which are present in every single cell. Your cells are like little batteries each with a positive and negative end. If you put batteries in your radio the wrong way round it won't work. The same principal applies to your cells.

Magnets push the cells back into perfect alignment so that any excess fluid and toxins are forced out of the tissues and flushed out of the body when you go to the toilet. You can "wee" up to 2 liters of unwanted, excess, toxin laden fluid once you start using clinical magnetic therapy

Fourth, the combination of your increased circulation and the elimination of toxins will allow your heart to take a rest. You will have less fluid to push around your body and your blood will be flowing much more efficiently which means your heart will not have to work so hard. Your blood pressure and pulse rate will naturally begin to lower and you will feel a tremendous boost in your energy levels. In a nutshell, you will have a terrific feeling of wellbeing.

Lastly, the accumulative result of more oxygen, more nutrients, balanced hormones and a rested heart results in a strengthened immune system. You will be less likely to catch "bugs" and viruses. You will be able to fight infections better and ward off coughs and colds. Your immune system protects your body from attack and harm. To protect your body your immune system must be strong and healthy.

Regarding 'MagneMax' Negative Magnetic Energy

Negative (North) magnetic energy has been shown to be very effective in eliminating cancer and Positive (South) magnetic energy has been shown to increase the growth of cancer, according to the research of Albert Roy Davis. All magnets have a North pole and a South pole. It is often said that there is no scientific proof that magnetism has any significant effect on our health. That is completely false. Without the magnetic field of the earth every living thing would die. Magnetism is essential to our survival. For example, when dinosaurs roamed the earth the magnetic field surrounding the earth was hundreds of times stronger than it is right now. As the magnetic strength weakened, the type and size of animals on earth changed. There is a direct relationship between the two.

We are continually bombarded by different man-made electromagnetic energies that do affect us, like microwaves, radio waves, 60 CPS AC (that's 30 pulses of North pole energy, and 30 pulses of South pole energy) electricity etc. Imagine the potential lawsuits if the authorities finally admitted that South pole magnetic energy is dangerous, and yet they've done nothing for decades to warn or protect the public from this threat.

They would also be admitting that there is a difference between the North and South poles, and though Davis contacted the U.S. government as early as the 1940's to inform them of his discovery, the government still won't acknowledge it, and it isn't taught in government schools either. If they were to concede that it is true now, it would amount to an admission of guilt to a huge deception. No explanation would be able to appease the public or repair the damage to our trust and belief in our government. So the bottom line is, don't expect them to confirm this.

If you research North vs. South pole magnetism you'll find that this is correct information, and North pole magnetism can be used to, among other things, help with or eliminate many diseases.....

I highly recommend (also) reading the book, "Racketeering in Medicine: The Suppression of Alternatives", by James P. Carter, M.D., Dr. P.H. Carter provides overwhelming evidence of the suppression of alternative medicine. It will be of great assistance in helping you to understand how our medical system truly works. Here are some excerpts from one of the chapters.

NORTH POLE:

(-) Negative Magnetic Energy Field:

- Increases cellular oxygen
- Pulls fluids & gases
- Reduces fluid retention
- Encourages deep restorative sleep
- Fights infection
- Promotes mental acuity
- supports biological Penetrating
- Reduces inflammation
- Normalizes acid base balance
- Relieves/stops pain
- Reduces/dissolves fatty deposits
- Reduces dissolves calcium deposits

SOUTH POLE:

(+) Positive Magnetic Energy Field:

- Decreases cellular oxygen
- Pushes fluids & gases
- Increases intracellular edema
- Stimulates wakefulness
- Accelerates micro-organism growth
- Inhibits biological Penetrating
- Can increase inflammation
- pH level becomes more acidic
- Increases pain
- Encourages fat depositing

"Clinical Observations of Dr. William Philpott"

For those who Enjoy 'learning' about Magnets and Magnetic Energy will find the following both Interesting and Informative...

Charging MagneMax with a 'Radial' aka Linear (End to End) N-S Pattern as opposed to a 'Azimuthal' Perpendicular (Sideways) E-W Pattern, produces a Directed Energy Flow rather than an Expanded (widened) Energy Pattern as seen by another types of 'Button' or Drum Magnets. And so, the More Direct the Concentration of Energy Flow, the Stronger the Flow of Energy.

Simple Science Behind Clinical Magnetic Therapy **October 6, 2009 — worldofmagnets**

Chinese, American, Russian, German and UK scientific studies have discovered that sufficiently strong magnets (not fridge or toy magnets) placed over and around an injury reduces pain and swelling.

The magnetic field created by placing magnets around your area of pain, which is completely safe and harmless, penetrates through your skin and into the muscles and tissue surrounding your injury, causing pressure on your nerves to be released and your pain to subside.

What's more, the same magnetic field stimulates the production of more red blood cells around your area of pain, which provides a rich, fresh supply of oxygen and healing nutrients to your area of pain. Most importantly, the blood carries a vast amount of endorphins (hormone), which are your body's natural painkillers directly to where your pain is.

Absolutely NO Side Effects

You will not feel any ill effects from clinical magnetic therapy. It does not alter the way your body works. In short, very simply, it stabilizes and realigns your body allowing it to heal the injured area it is placed around.

And remember, it is 100% nontoxic, drug and chemical free and entirely harmless.

Plus, you are perfectly safe to use magnets if you take prescribed or non-prescribed (supplements) medication. They do not interfere with any tablets regardless of how many you consume each day or what they are. You will be completely safe using clinical magnetic therapy.

The facts are these:

About 63% of users of clinical magnetic therapy are able to significantly reduce the amount of painkillers they take. 35% no longer need any painkillers at all. The correct clinical magnetic therapy treatment is a breakthrough in pain management and relief with the added important benefit of physically freeing immobile joints.

Our Valued *MagneMax* Customer's offer a few simple Suggestions...

- 1) Understand that MagneMax is a 'Treatment' and therefore, will produce better results over time.
- 2) If you are wearing and you feel they need to come off, take them off. Listen to your body, it will tell you when to put them on and take them off. Your body is like a cell phone, the more you use it the faster the battery runs down so you have to plug it in again. MagneMax breaks up the red blood cells and create the oxygenation needed to give the body the tools it needs to recharge and repair itself quickly and it does.
- 3) If you are in a lot of pain in a specific area put MagneMax over that area directly. Feel free to move the MagneMax around from time to time. Experiment on yourself to find the best areas that help you the most.
- 4) Your body will take time to correct things however MagneMax will cut that time in half.
- 5) Treat MagneMax as a priority, don't forget to put them on and remember they are there to help you.
- 6) Remember there are many people that care about your well-being and only an email or a phone call away.
- 7) After time, you do not have to wear MagneMax as much and you can get away with only using the necklace or the bracelet on their own once in a while.
- 8) This is not a fashion show but with the different colour covers that are available does look really good.
- 9) If they feel a little heavy at first, give your body a chance to build the muscle to support it. Eventually you won't feel them.
- 10) Be prepared to feel better and accept the fact when it happens, you have to want to feel good.

Noticeable Effects:

- 1) The whites of the eyes will go as white as porcelain. The natural color of the eyes will brighten.
- 2) The eyes open wide, the face tightens filling in the wrinkles and the bags under the eyes are reduced
- 3) During the first 3 hours of wearing MagneMax you will feel a little tired as your body begins to change and oxygenate. Once this process has been fulfilled you become energized with a great feeling of calmness.
- 4) You will feel the blood flow a little more intense with tingling sensations transferring to different parts of your body.
- 5) Blood flow becomes more smooth and certain veins reduce in size which bring down swelling.
- 6) Once the swelling reduces, the Penetrating process begins which usually takes about a day or so. You just have to stick with it and keep an open mind.
